

ARE YOU PASSIONATE ABOUT IMPROVING HEALTHCARE OUTCOMES THROUGH TEAMWORK AND INNOVATION?

Explore the Future of Healthcare Through Interprofessional Education & Collaborative Practice

Become part of an innovative research focus area that is transforming how professionals learn and collaborate to enhance health outcomes and service delivery. With your master's research, you can help create collaborative, patient-centred professionals ready to lead change.

Research areas could include:

- ▶ Investigate how students from various disciplines learn with, from, and about one another.
- ▶ Explore the impact of interprofessional collaboration on healthcare quality and safety.
- ▶ Create approaches to improve collaboration and break down professional silos in healthcare environments.
- ▶ Developing guidelines to support interprofessional education in higher education contexts.

Why Choose IPECP Research?

- ▶ Tackle relevant, real-world challenges in education and healthcare systems.
- ▶ Gain valuable skills in leadership, systems thinking, and interdisciplinary communication.
- ▶ Contribute to an expanding field with global relevance.
- ▶ Work alongside experienced supervisors in a supportive research environment.

Join us in advancing interprofessional education and collaborative practice!
